

Joining techniques and equipment

Certificate

Urmas Erit

Modules:

- Knowledge about process-optimizing working procedures
- Spot welding with safe measuring and controlling procedures and documentation
- Drilling of high and ultra high strength steels and aluminum
- Milling of high and ultra high strength steels and aluminum
- Sawing of high and ultra high strength steels and aluminum
- Tools for process-optimizing separation and their proper usage
- Application of safe hardening working processes
- Quality assurance (testing of connections)
- Summary and quality control
